

HIGH SECURITY INSTITUTIONS

High security organizations need to make sure that their doors are fully locked and not just closed. Access control and the efficiency of integration are key - with ADIOS you get it all. No need to replace locks or existing access control system - we can retrofit and integrate in a cost effective way. Additionally it is designed to function in large installations of multiple doors and offers a series of high security features including advanced permissions and dual security.

RETAIL, STORAGE & LOGISTICS

Warehouses, distribution centres and storage rooms are often in remote areas and are frequently accessed. The ADIOS system enables you not only to lock and manage multiple doors securely from a distance, but also to receive information about its use and status as we. Further due to its flexible architecture, it can easily scale with the changing needs.

SENIOR CARE & ACCESSIBILITY

Elderly care and life alert service companies need to get frequently into homes and residences of seniors. If in emergency situations nobody can open the door, valuable time can be lost. Our solution enables you to get access in any situation while maintaining a high-level of safety. Several integration options are available to fit the needs of security, connectivity, management, and cost-effectiveness.

PRIVATE HOMES & AIRBNB

Apartment and house owners as well as renters look for high security to protect their valuables or in case of AirBnB the valuables of their guests. Better control enables to know when for instance your kids or your guests have arrived. The capability to open doors and manage access control from anywhere increases efficiency and convenience significantly. The ADIOS system offers all 3 benefits in one solution out of the box.

HOTELS & MOTELS

ADIOS is not only an access control system for hotel rooms - it provides unique and cost effective connectivity solution enabling you a 24x7 visibility of who is entering any door in a hotel. Optionally the cloud based management system enables smaller hotels to provide their guests 24x7 access to their room even when there is no reception.

DISTRIBUTORS & RESELLERS

Whether you are a distributor of access control systems, a security service provider, a telecom with smart home solutions or a senior care service provider - If you are interested in a partnership, please leave us your details and we'll get back to you to discuss your questions.
